

The General Representation and the General Directorate closer to the Regions

The General Representation and the General Directorate began their administration carrying out a movement of getting closer to the Councils of Central Administration (CONACES) and the local Representations.

“Our objective is to work in friendship to strengthen our União”, said the General Representative Mestre, Paulo Afonso Amato Condé.

Encontro das 1ª, 6ª e 15ª Regiões

The first meeting of the CONACES for this current administration, which took place in Porto Velho-RO on March 23rd and 24th, brought together the CONACES of the 1st, 6th, and 15th Regions. The General Directorate presented the accounting of the different funds raised, such as for the Participation Fund, the Health Fund and the funds raised for the Faixa Adicional; it also presented administrative projects currently underway and cleared up the doubts with respect to the topics regarding this subject.

The General Representation explained the priorities of this Administration and brought the main orientations necessary at this time to the Representative Mestres and to the entire Direction of the Center.

Seed Bank will be implemented in a network

On March 6th and 7th, a meeting of the Department of Plantation and Environment was held where it was decided to implement the Seed Bank project, which will be done via Networking (in a participatory way with the Núcleos of the UDV), where the native species of Mariri and Chacrona (matrices) will be cultivated in the areas of the Núcleos' plantations, near where they were collected. This project will be presented to the Management Committee of the General Directorate and then to the CONAGE for approval.

The Núcleos that are interested will be responsible for this conservation and they will receive support in order to maintain each sample identified and preserved.

Goals and objectives of the Plantation Department

On April 7th, also in Sede Geral, a planning meeting for the Department of Plantation and Environment took place, where goals, objectives and priorities were established for the work in this triennium.

Additionally, the main scientific studies currently underway with our sacred plants were presented.

Approved Department logo

A logo for the DPMA was approved (created by designer Silvio Leossi) that will be used in documents, promotional products and other publications of the Department.

A line of communication, In Real Time

The newsletter, In Real Time, is the new line of communication of the General Directorate and the General Representation. Produced by the Department of Memory and Communication-DG, its objective is to be a direct channel with the associates of the Center, sending summaries in real time, whenever possible, of the developments of the General Directorate and the General Representation.
