

Message from the General Representative Mestre

Novo Encanto Association, a richness for the União do Vegetal

The União do Vegetal has a rich heritage brought by Mestre Gabriel and by us, by way of the Novo Encanto Association of Ecological Development, and we have the duty of not only preserving it, but also of cultivating it and knowing how to manage its good use.

It is of great value for us to have Novo Encanto assisting the UDV in taking care of this immensely rich patrimony that we have, which is the Vegetal and all of these plants and forests that make up this enchanted world that Mestre Gabriel brought for us: the União do Vegetal.
